

Wanclouds AI:
Transform & Simplify Cloud & IT
Infrastructure Management with Agentic AI

Turn your Operation team and SREs
into superheroes

Wanclouds AI makes existing SREs and NOC engineers super heroes and closes the expertise and experience gap when managing Infrastructure and workloads. It’s an intelligent, always-on infrastructure assistant—built to revolutionize how organizations manage multi-cloud and hybrid IT environments. By combining autonomous monitoring, proactive resolution, and adaptive intelligence, it reduces operational overhead, improves uptime, and delivers actionable insights. Wanclouds AI helps you cut through the noise of traditional IT operations and empowers your team to focus on growth not fire fighting.

The Wanclouds AI Solution

Wanclouds AI simplifies cloud and IT operations by autonomously detecting, diagnosing, and resolving infrastructure issues—integrating directly into your stack and tools.

Traditional IT & Cloud Management is Costly & Inefficient

Enterprises today face mounting challenges in managing infrastructure and workloads:

- **Noisy alerts and alert fatigue** overwhelm teams and reduce response times.
- **Large NOC/SRE headcounts** are required to manage routine tasks & troubleshooting.
- **High operational costs** with inconsistent reliability across hybrid/multi-cloud environments.
- **Manual resolution processes** slow down digital transformation.
- **Disconnected toolchains** create silos and inefficiencies.
- **Unmanaged configuration drifts** increase risk & compliance failures.

Key Features

- **Autonomous 24/7 Monitoring & Resolution**
Detects and fixes issues automatically with notifications via Slack, email, or tickets. It covers servers (Linux, Windows), Kubernetes, Firewalls, Routers, Switches, and more
- **Adaptive Memory & Learning**
Continuously improves by learning from every incident in your environment.
- **Seamless Tool Integration**
Works natively with Prometheus, Zabbix, Cloud APIs etc, and your existing ecosystem.
- **Customizable to Any Stack**
Integrates with your tools via MCP and custom agents for a tailored fit.
- **Proactive Integrity & Drift Detection**
Prevents misconfigurations and security risks through constant change monitoring.

Key Benefits

Benefit	Impact
Cut Costs by up to 50%	Replace routine NOC/SRE work with AI automation.
Faster Issue Resolution	Auto-resolve problems before they escalate.
Improve System Reliability	Reduce downtime and boost infrastructure resilience.
Boost Team Productivity	Free up engineers to focus on innovation.
Scale with Confidence	AI adapts and grows with your environment.
Accelerate Digital Transformation	Simplify and modernize IT workflows across your enterprise.

Why Wanclouds? Differentiation That Matters

- **Enterprise-grade customization:**
We tailor our AI solution to fit your needs using your existing tools and infrastructure.
- **Minimal onboarding friction:**
No rip-and-replace—just plug, customize, and automate.
- **Multi-cloud expertise:**
Proven success with AWS, Azure, GCP, IBM Cloud, and more.
- **Trusted by global leaders:**
IBM, Cisco, QAD, and other top brands rely on Wanclouds.
- **One platform, complete visibility:**
Unified view across diverse tools and infrastructure.
